

# Rebase wall reinforcements

Our wall reinforcements/universal fixtures are used in lightweight walls such as drywalls. For installing wall-hung water closets for both surface mounted and in-built cisterns, bracket and bolt mounted wash basins, surgery wash basins in hospitals, sinks, and other heavier sanitation equipment.

Art.no	Vertical installation	Lateral installation
20.000	120 mm	200 mm
20.003	120 mm	160 mm
31.450	70 mm	95 mm

Minimum clear interior wall dimensions for vertical and lateral installation.

# A family business

Rebase is a Swedish family company established in 1989 in Kungälv just north of Gothenburg. Over the years, we have acquired and moved to our own new and larger premises in order to satisfy the increasing demand for our products.

We have two main product groups. Accessories for the disabled and suspensions for sanitary products (wash basins and toilets, etc.) and other sanitary products that attach to lightweight walls, such as drywalls. For the latter category, we provide products such as drainage connections for wastewater and wall washers and fittings for fresh water.

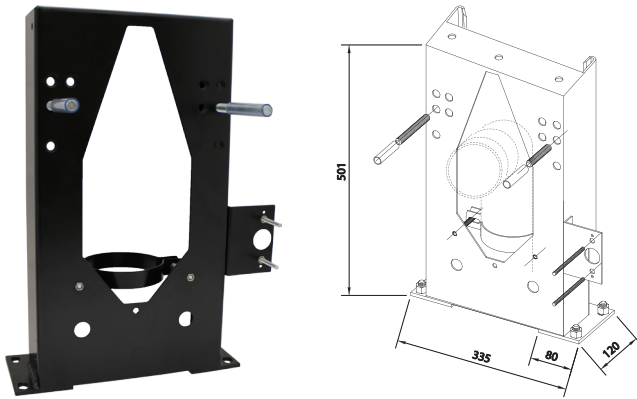

We have delivered a number of major projects in Sweden and Norway for hotels, hospitals, stadiums and prisons. These include, Karolinska University Hospital, Stockholm, Tele2 Arena, Stockholm, Malmö Arena, Malmö, Police Headquarters, Gothenburg, Ullevaal Hospital, Oslo, Akershus University Hospital, Lørenskog centre and the Rågården forensic psychiatry building in Gothenburg.

We are the market leader in wall reinforcements for wash basins and toilets in Sweden. A position that we have earned by delivering affordable and quality products with high delivery reliability characteristics which have given us an excellent reputation in the industry. We enjoy robust sales for our drain connections and our wall coupling system sales are increasing steadily. Nationwide wholesalers in Sweden and Norway stock a large part of our range.

# NEW!

Rebase has developed an independent armrest that does not require permanent installation. The armrest is suitable for both wall-mounted and floor-mounted water closets.

The armrest is suitable for both temporary and permanent use, for example, in hotels and for home adaptations where you do not want any alterations to your property, which a traditional armrest requires.

The lightweight design makes it easy to move whenever necessary, and gives you the option of easily disassembling and assembling the armrest which facilitates storage.

Free-standing

Only three components
